

## SAVINGS

**Estimate of \$20 savings per cow annually.**

- Stop overspending on surplus supplies and slow-moving items
- Reduce stock-outs and avoid urgent reorders
- Optimize inventory to ensure products are used before expiration

## EFFICIENCY

**Minimize the need for additional labor.**

- Evaluate stock levels to make more informed ordering decisions
- Automate order processing to enhance accuracy and save time
- Accelerate the receipt and verification of purchases

## INTELLIGENCE

**Careful decisions ensure operations run sustainably, optimizing resources.**

- Gain insights into animal health trends through product usage reports
- Ensure protocol compliance with staff-generated reports
- Prevent drug residues by monitoring usage reports
- Tailor reports to fit your specific requirements

## PRODUCTIVITY

**Boost profitability by enhancing productivity.**

- Streamline your supply room and maintain order with barcoded shelf labels
- Locate the product you need in seconds, not minutes
- Free up your time to concentrate on more critical areas of your business

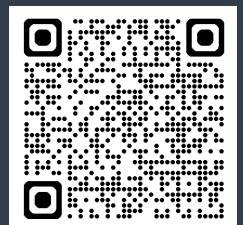

## SECURITY

**Protect your assets.**

- Restrict inventory access to authorized personnel only
- Keep accurate records for tax and insurance requirements
